

SINGER[®] HyperFont[™]: Creating Text

The Hyperfont[™] program can be found under the "Create Menu" after the program has been installed.

After choosing Hyperfont[™] – click "NEXT" on the Wizard screen:

Then type in the text in the dialog box and choose the font from the built-in lettering on your computer:

Then Click on NEXT.

HyperFont Wizard		×
Steps 1- Enter Text 2- Embroidery Properties Fill - one stitch direction only	This step allows you to choose a filling style for the letters. "Fill" has one stitch angle and is good for Large Letters. "Column" has variable stitch angles like "traditional" Lettering.	
Column - variable stitch directions	Click "Fill" or "Column". (ill stitch) C column stitch 2 - Click "Finish"	
]	< Back Next> Cancel Finish	

Choose Fill Type - Fill Stitch has only one stitch direction

-	
-	
<u> </u>	

Column Stitch has variable directions:

After selecting desired fill type click on "Finish".

This will take your lettering to the TEXT screen in the SINGER[®] FUTURA™.

On this screen you can edit the size and spacing or Letter Frame of the text. Then you will left click to apply stitches.

SINGER is sewing made easy....
